

# Credit Recovery Solutions

*Pretests and assessments give students an advantage in recovering course credits.*

Curriculum

Assisting high school students who have failed or are at risk of failing a course can be quite a challenge. Join the growing number of schools and institutions using the *A+nyWhere Learning System*<sup>®</sup> software program. The backbone of the *A+LS*<sup>™</sup> Credit Recovery Bundle is a service of comprehensive assessments that test students in five Curriculum subject areas – Mathematics, Literature and the Arts, Writing, Science, and Social Sciences. Our pretest for Credit Recovery pinpoints individual student skill deficiencies and automatically assigns lessons that teach those skills. After students progress through the lesson material in a self-paced environment, the post-test measures and records academic gains, indicating whether students have displayed a mastery of the deficient course skills.

## Comprehensive Courseware Curriculum

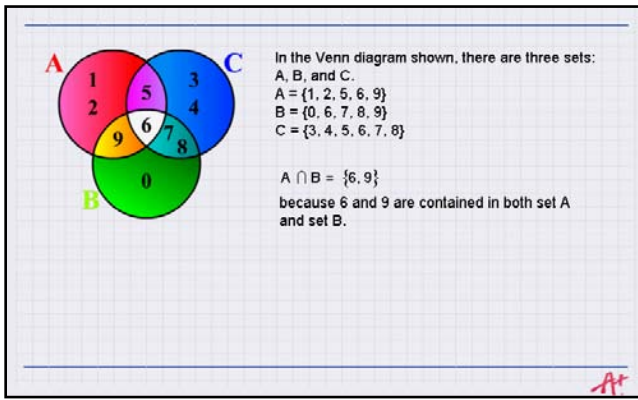

The *A+LS* Credit Recovery Bundle is comprised of 34 *A+nyWhere Learning System* titles. These titles contain over 1,400 hours of study and are aligned to state and national standards. The Credit Recovery Bundle uses the proven instructional format of study, practice test, mastery test, and essay to prepare students for the recovery of the course credit or the prevention of failing the course. Use of the Credit Recovery Bundle will also help students improve overall test-taking skills. Students will test with confidence after completing our proven program of study.

## Features and Benefits

- Alignment to State Standards
- Comprehensive Content
- 34 Curriculum Titles
- Powerful Management System
- Automated Lesson Generation
- Computer-Assisted Learning
- Streamlined Assessment
- Spanish Titles Available\*

\*Not all titles available in Spanish.

**Aspire.  
Act.  
Achieve.**

1

Study Guide page from an algebra lesson on intersections and unions.

Study Guide page from a science title on cells and cell theory.

2

**Osmosis** (ahs MOH sihs) is a special kind of diffusion. Osmosis occurs when water moves across the cell membrane. Osmosis is the kind of diffusion that keeps a plant from wilting.

All cells need energy. Cells with chloroplasts get energy from the sun. The leaves and green stems of plants make food from sunlight, water, and carbon dioxide using a process called **photosynthesis**.

## Our Flexible Program Provides the Following:

- Course instruction
- Skills mastery report
- State standards attainment report
- Course academic grade attainment report...and more!

### The A+LS™ High School Credit Recovery Title List

| Mathematics        | Literature/Arts        | Writing     | Science               | Social Science            |
|--------------------|------------------------|-------------|-----------------------|---------------------------|
| Pre-Algebra        | English Literature IX  | Writing IX  | Biology               | U.S. Geography            |
| Real World Math    | English Literature X   | Writing X   | Earth & Space Science | History of America I      |
| Geometry           | English Literature XI  | Writing XI  | Chemistry I           | History of America II     |
| Algebra I, Part I  | English Literature XII | Writing XII | Chemistry II          | World Geography           |
| Algebra I, Part 2  | English Skills IX*     |             | Physics               | History of the World I    |
| Algebra II, Part 1 | English Skills X*      |             |                       | History of the World II   |
| Algebra II, Part 2 | English Skills XI*     |             |                       | Civics                    |
|                    | English Skills XII*    |             |                       | Mid-Level Social Sciences |
