Tracey Coker, *Counselor*

March 15, 2007

To Whom It May Concern:

It's almost TAKS time, and I would like to recommend the A+ Program to every school district in the area!

Last year, we discovered that we had trouble covering all of the TEKs in our 8th-grade History class, and the TAKS Test was about a month away. So our principal cleverly brought students into the computer lab one period every day and let them work through the A+ Program for History.

Yes, we passed! With flying colors!

And we can say that the A+ Program saved the day!

Thanks, A+ writers, programmers and staff, for the software that you have pulled together. It's an awesome program that will help with any subject area.

Sincerely yours,

A handwritten signature in cursive script, appearing to read "Debbie Yates".
