October 8, 2009

Dear Mr. Herries,

This is to thank you and A+ Educational Technology Learning system for providing L.E.A.D. Academy with an outstanding product for our students.

Your product has been used for four years in our program for "at risk" students. As you recall the highly qualified teaching staff at LEAD Academy investigated other products and without hesitation decided to use this program. We have found that our student population has benefited not only with credits but also with the ability to pass the TAKS. The alignment is outstanding with the TEKS.

We are approaching the 100th graduate from our school of choice, LEAD Academy, in our November graduation. As you know the students graduate when all state and local requirements have been met. Students are recognized in cap and gown as well as congratulated by the school board and superintendent at each monthly board meeting. Their family and friends are all invited to attend this meeting to join in the celebration of their accomplishment.

I want to pass along the compliment made by the teachers as to the assistance that your company is so willing to give us at any given time. We have truly enjoyed seeing the success of each of our students and continue to have outstanding results.

Your company is to be commended for its interests in and concern for our schools and this special program. Our students have certainly profited from their experience and success here at LEAD with the A+ program.

Sincerely,
D'Wanna Finkel
Executive Director
